EPA SF Bay Delta Action Plan DSC 092712.pptx

FYI - We will be making 2 public presentations in the next few days. Both will be webcast. Tomorrow, Erin will brief the Delta Stewardship Council on our Action Plan, using the powerpoint attached below.

On Monday, Bruce and Erin will participate in the State Water Board's workshop on Bay Delta fish issues to consider as the Board revisits its Delta flow standards. (This is the second of 3 workshops.) I didn't attach that powerpoint because of the size of the file but if you'd like it, let me know. The conclusion of our remarks to the Board are that: fish benefit from flows that mimic the pattern of the natural hydrograph; the existing (1995) standards restored some of the springtime pattern and fish positively responded; the Board should modify the standards to address more of the year, especially the Fall. We are harmonizing these remarks with those from DFG, FWS and NMFS, hoping a unified message will be more compelling to the Board.
